remove the toughest stains & make your carpet look professionally cleaned GENESIS 950 CONCENTRATE Pet stains & odors grease, tar & oil paint, ink & makeup food & juice rust, glue & more

SPOT CLEANING

For General Cleaning, mix 1 part Genesis 950 to 7 parts water in a spray bottle, bucket or other type container. For heavier stains, mix 1/3 parts Genesis 950 to 2/3 part water. Spray stained area with mixture and allow to sit for about 2 minutes. After mixture has absorbed into stained area, scrub the area with a scrub bush, sponge or rag. After you have scrubbed area, rinse clean with water.

For difficult stains, you may increase the amount of Genesis® 950 to as high as a 50/50 mix. Difficult stains may require you repeat the process. For extremely strong stains, it may be best to repeat the process a second time after the stained area has dried after the first attempt.

Locate stain. In this example we are using a rust stain on carpet

Spray with Genesis® 950/water mixture & let sit for about 2 minutes

Scrub stain until it is not visible

Rinse area clean with water. Repeat steps 1-4 if stain is persistent

When finished, be sure to blot with dry towel or use wet vacuum to remove water residue

STEAM CLEANERS, RUG DOCTORS & CARPET CLEANING

In machines that have 1 compartment for water and solution, mix water and Genesis® 950 Concentrate at a ratio of 1/3 Genesis® 950 to 2/3 water. If you are cleaning a carpet with pet stains that have seeped into the carpet, you will get the best results using Genesis® 950 at a 50/50 mix with water.

Several household machines have 2 separate compartments. One compartment is strictly for water, and the other strictly for cleaning formula. For these machines, do not pre-mix Genesis® 950 with water. Fill the compartment specified for cleaning solution with only Genesis® 950. These machines have settings for low traffic, medium traffic and heavy traffic and will automatically mix the water and Genesis® 950 as they are applied to the carpet.

PET STAINS

Pet stains can be more difficult to remove. For old, foul smelling pet stains, Genesis 950 should be used in a carpet cleaning machine. The mixing ratio of Genesis 950 and water should be used at a 50/50 mix for these types of stains. Odors and stains from pet urine seep into the padding. By increasing the ratio of Genesis 950, and properly using a carpet cleaning machine, you will be able to not only clean surface stains, but you will also be able to clean, disinfect and remove odors that are deep in the carpet padding. If odor still persists, check your subfloor type to see if the urine has seeped into cracks in concrete or been heavily absorbed by wood or plywood.

Genesis 950 is a 2016 Green Scene Mom Award Winner

CARPET CLEANING INSTRUCTIONS

- **1.** If desired, pre-treat any outstanding stains with a mixture of Genesis® 950 and water as outlined in the spot cleaning example.
- 2. Slowly go over carpet with the desired ratio of Genesis® 950 & water in your steam cleaner, Rug Doctor or carpet cleaning machine. Be sure to fully saturate the stained area with the mixture of Genesis® 950 and water. Genesis® 950 works regardless of water temperature although most people prefer to use warm water. Do NOT use hot water as high temperatures may melt the carpeting adhesive under the padding.
- **3**. Allow the carpet to sit for about 30 to 40 minutes to give the solution time to break down the stains. Genesis® 950 will break the bonds of stains, allowing them to be lifted from the carpet.
- **4.** After the carpet has been allowed to sit, fill your machine with ONLY water. If your machine has a separate compartment for the cleaning solution, remove the compartment or change settings so only straight water is dispensed from the machine. This rinsing process will flush everything Genesis® 950 has broken down in your carpet. You may notice your return water is black. This is from everything that has been removed from the carpet. You may want to repeat this step until the return water is clear to ensure you are removing all dust, dirt, bacteria and stains from your carpet.
- 5. After you have rinsed the carpet, allow to dry before foot traffic is allowed on the carpet.

2.5 & 5 Gallon Cap Removal

To open the 2.5 or 5 gallon container, apply pressure downward and turn left. If you are unable to remove the car by hand, use a wrench for extra leverage.

The caps are placed on extra tight to prevent spillage or damage in shipping.

Reusable spigots & spray bottles are available at www.genesis950.com
